

Earthquake Research in China

General Contents, Vol. 32 (2018)

No. 1

Research Overview

- A Review on the Research Progress in Operational Earthquake Forecasting (OEF) in the World
Bi Jinneng and Jiang Changsheng (1)

Research Papers

- Earthquake Probability of the “Seismic Gap” on the Longmenshan Fault
Song Jin, Jiang Haikun, Meng Lingyuan, and Zang Yang (15)
- Tomography for Q of the Eastern Section of the Tianshan Area from High-frequency Attenuation of S-wave
Li Jin, Zhou Longquan, Wang Huilin, and Xiang Yuan (28)
- The Study on the Strong Ground Motion Attenuation Relationship in the Pishan Area, Xinjiang Uygur Autonomous Region
Li Wenqian, Tao Zhengru, Wei Bin, and He Jingang (40)
- Study on the Moment Magnitude of Small and Moderate Earthquakes Located in the Inner Mongolia Region
Liu Fang, Zhang Fan, Li Bin, and Na Re (53)
- Research of the Differential Uplifting in the Palongzangbu Region Based on the Synthesis of the Watershed Index and Seismic Data
Wang Lin, Zhao Yan, Tian Qinjian, Li Wenqiao, and Xu Yueren (64)
- Study on the Anisotropy of the Underground Medium in Hohhot
Zhang Hui, Zhai Hao, and Han Xiaoming (80)
- The Crustal Velocity Structure of Western Inner Mongolia
Zhao Yanhong and Jia Xiye (89)
- Focal Mechanism and Focal Depth of the May 22, 2016 $M_s 4.6$ Earthquake in Chaoyang, Liaoning
Zhao Xing, Zhang Fan, Han Xiaoming, Wang Shubo, and Wei Jianmin ... (100)
- Current Vertical Motion Analysis of Northwestern Margin of Ordos Based on Precise Leveling
Guo Baozhen, Ta La, Zhou Haitao, and Su Guangli (113)
- The NE Directed Seismicity Belt in Tibet after the $M_s 8.1$ Nepal Earthquake and Its Predictive Significance
Wang Shuangxu, Zhu Liangyu, Xu Jing, Ji Lingyun, and Jiang Fengyun ... (119)
- The Background Variation of Natural Source ELF and Its EM Abnormal Phenomena in Yunnan Earthquakes
Fan Ye, Tang Ji, Han Bing, Cui Tengfa, and Xu Qin (130)
- A Review of Seismicity in 2017
Jiang Xianghua, Wang Yue, Han Yanyan, Xue Yan, Yang Wen, Zang Yang, Deng Shiguang, Ma Yawei, Yao Qi, Song Jin, Shi Haixia, Zhang Xiaotao, Meng Lingyuan, and Zhou Longquan (141)
- Status Report on the International Conference for the Decade Memory of the Wenchuan Earthquake and the 4th International Conference on Continental Earthquake
Zhang Yan and Xu Qin (150)

No. 2

Research Overview

Intermediate to Long-term Estimation of Strong Earthquake Risk Areas in the Chinese Mainland Based on Geodesic Measurements

Zhang Jing, Zhu Yiqing, Wu Yanqiang, Zhang Xi, and Yang Guohua (153)

Study of the $M_s7.0$ Jiuzhaigou Earthquake

Characteristics and Analysis of Seismic Damage from the $M_s7.0$ Jiuzhaigou Earthquake in the Area between Songpan and Jiuzhaigou

Yan Zhaolun, Peng Xiaobo, Li Shuguang, and Hong Haichun (173)

Emergency Response to the $M_s7.0$ Jiuzhaigou, Sichuan Earthquake, and Characteristics of Seismic Disasters in the Stricken Area in Gansu Province

Shi Yucheng, Jing Tianxiao, and Gao Xiaoming (189)

Comparison of Computational Methods for Instrumental Intensities Using the $M_s7.0$ Jiuzhaigou Earthquake Data

Li Min and Li Xiaojun (200)

Research Papers

Temporal and Spatial Evolution of Precursory Anomalies of the Wenchuan $M_s8.0$ Earthquake and Their Mechanical Analysis

Zhang Xiaotao, Liu Jie, Song Zhiping, Xue Yan, Zhang Yongxian, Yan Rui, and Yuan Zhengyi (212)

Double Difference Location of the Mainshock and Aftershocks of the Hutubi $M_s6.2$ Earthquake That Occurred on December 8, 2016

Kong Xiangyan and Chen Xiangjun (227)

The Focal Depth Analysis of the Inner Mongolia-Ningxia Border Area Earthquakes

Liu Yongmei, Liu Fang, Liu Gaimei, and Zhang Fan (233)

Determination of Focal Depths of the $M_s5.8$ Alxa Left Banner, Inner Mongolia Earthquake Sequence

Li Bin, Wang Shubo, Wei Jianmin, Zhang Haoming, Liu Yongmei, Wu Jun, and Hao Liang (245)

Establishment of the ELF Network in Yunnan and Electromagnetic Precursory Monitoring Results of the Yangbi $M_s5.1$ Earthquake on March 27, 2017

Zhang Ping, Zhao Guoze, Tang Ji, Liu Feng, Sun Weihuai, Han Bing, Wang Lifeng, and Zhang Li (254)

Reliability Evaluation on Weak Signal Extraction for Airgun Source Surveys

Wu Anxu and Ye Beng (265)

Analysis of the Characteristics of the D. P. R Korean Seismic Event on September 23, 2017

Du Guangbao, Zhao Yong, Sun Li, He Shaolin, and Liu Jie (280)

Study of the Reservoir Damage during Cyclic Injection and Extraction Process in the Hutubi Gas Storage

Wang Jianbo, Ge Hongkui, Wang Xiaoqiong, Liu Tongyuan, Liu Dunqing, Zhang Yanjun, and Wu Shan (288)

No. 3

Research Overview

The Key Technical Points and Main Characteristics of the New National Standard of Magnitude

Liu Ruifeng and Wang Liyan (301)

Regional Scale Seismological Investigation on the Continent Crust Using Airgun Sources——A Perspective Review

Wang Weitao, Wang Baoshan, Jiang Shengmiao, Hu Jiupeng, and Zhang Yuansheng
..... (315)

The Present Status and Prospect of Earthquake Focal Depth Locating

Zheng Yong and Xie Zujun (330)

Research Papers

The Tongliao $M_s5.3$ Earthquake and Its Foreshock Determination

Wang Shubo, Zhuoli Getu, and Li Juan (344)

Analysis of the Frequency Domain Water-level Deconvolution Method Based on Reservoir Airgun Source Data

You Xiuzhen, Li Jun, Lin Binhua, Huang Yandan, Wu Lihua, and Guo Yang
..... (355)

Research on the Seismic Wave Characteristics of Low Frequency Signals before the Alxa Left Banner $M_s5.8$ Earthquake in Inner Mongolia, China

Liang Shasha, Gao Lixin, Dai Yong, Ge Gen, and Wang Lei (367)

Analysis of Gravity Changes before and after the Akto $M_s6.7$ Earthquake in 2016

Ailixiati Yushan, Liu Daiqin, Li Jie, Li Rui, Abudutayier Yasen, Sun Xiaoxu, Zhu Zhiguo, Li Guirong, and Chen Li (377)

Research on Regional Crustal Deformation Characteristics Using Displacement Time Series Data of GNSS Reference Stations in Xinjiang

Li Guirong, Wang Xiaoqiang, Li Jie, Liu Daiqin, Ailixiati Yushan, Chen Li, and Li Rui (388)

Application of the Levenberg-Marquardt Method in Improving Technology of the Seismic Influence Field

Yang Yanming, Jiang Lixin, and Wang Zhenxiang (400)

A Preliminary Analysis of the Earthquake Disaster of Buildings during Two Destructive Earthquakes in Xinjiang

Wen Heping, Hu Weihua, Tan Ming, Sun Jianing, and Tang Lihua (412)

3-D Simulation Study on Seismic Response of Bridge Piles in Landslide

Hou Chaoping and Liu Qi (425)

Analysis of Thermal Infrared Anomalies for the April 16, 2013 $M_w7.8$ of Khash, Iran Earthquake

Wang Ying, Zhang Yuansheng, and Wei Congxin (435)

A Review of Seismicity in the First Half of 2018

Zhai Luyuan, Ji Yunda, Jiang Xianghua, Yang Chen, and Lu Jinglin (442)

No. 4

Research Overview

Moment Magnitude and Its Calculation

Chen Yuntai and Liu Ruifeng (447)

Review of the Application of Rotational Motions in Seismology

Zhang Pei, Liu Wenyi, Yuan Yi, and Li Jun (456)

Research Papers

Precise Location of Earthquakes at the Eastern Boundaries of the Sichuan-Yunnan Rhombic Block

Fu Ying, Hu Bin, Long Feng, and Wang Shiyuan (470)

Relocation of the Jinghe $M_s6.6$ Earthquake Sequence on August 9, 2017 and Analysis of the Seismogenic Structure

<i>Liu Jianming, Gao Rong, Wang Qiong, and Nie Xiaohong</i>	(482)
Relocation of the $M_s5.7$ Earthquake Sequence in Songyuan, Jilin Province, 2018 and the Analysis of Its Seismogenic Structure	
<i>An Yanru, Zhang Yingying, Yang Zhigao, Bai Lanshu, and Liu Jie</i>	(491)
Anomaly Feature Extraction of the Gravity Field before the Jiuzhaigou Earthquake in 2017	
<i>Liu Fang, Zhu Yiqing, Zhao Yunfeng, and Liu Tao</i>	(501)
Research on the Crustal Velocity Model of the Yunnan Region and Its Application	
<i>Yang Jingqiong, Yang Zhousheng, and Zhang Huiyuan</i>	(510)
Spatial Correlation Anomalies of the Diurnal Variation of the Geomagnetic Vertical Component before the Yingjiang $M_s6.1$ and Ludian $M_s6.5$ Earthquakes	
<i>Dai Yong, Feng Zhisheng, Yang Yanming, and Gegen</i>	(521)
Seismic Inventory Simulation and Conformance Test Based on the Monte Carlo Method——A Case Study of the Fenhe-Weihe Belt	
<i>Shao Xiaoyi, Wang Xiaoqing, Dou Aixia, and Yuan Xiaoxiang</i>	(533)
A study on the Seismic Velocity Changes before and after the 2016 $M_s6.4$ Menyuan Earthquake Using the Active Source Data in the Qilian Mountain	
<i>Zou Rui, Guo Xiao, Zhang Yuansheng, Qin Manzhong, and Yan Wenhua</i>	(549)
Experimental Research on Dynamic Shear Modular Ratio and Damping Ratio of Sandy Gravel Soil	
<i>Wang Xiaojun, Zhao Fengxin, You Hongbing, and Nie Dawei</i>	(560)
Application of Ultra-shallow Seismic Survey to the Wanggezhuang Fault in Qingdao	
<i>Yang Qiyan, You Huichuan, and Di Long</i>	(574)
Seismic Damage to Owner-Built RC Frames in Charikot during the 2015 Nepal Earthquake Sequence	
<i>Qu Zhe, Wang Tao, Lin Xuchuan, Zhang Haoyu, and Yang Yongqiang</i>	(584)
General Contents, Vol. 32 (2018)	(602)
